

Hiruy Legesse Adane *Software Developer*

 hiruyadane@gmail.com  +251939776522  Addis Ababa, Ethiopia
 github.com/hiruy72  linkedin.com/hiruy-legesse

Motivated and detail-oriented Software Engineering student at Addis Ababa University with a GPA of 3.97. Strong foundation in Python, data structures, algorithms, and mathematics, with practical experience developing full-stack applications using React and Node.js.

EDUCATION

Addis Ababa University , <i>Software Engineering</i>	12/2023 – Present Addis Ababa, Ethiopia
Pursuing a B.Sc. in Software Engineering with a current GPA of 3.97	
St.Gabriel School , <i>High School Diploma</i>	10/2019 – 04/2023 Hawassa, Ethiopia.
Achieved 562/700 on the Ethiopian School Leaving Examination	

SKILLS

Programming Languages: Python, Java, JavaScript, C++, **Mathematics:** Applied Mathematics, Probability & Statistics, Discrete Mathematics, **Databases:** MySQL., PostgreSQL, MongoDB, **Tools & Platforms:** Git/GitHub, VS Code, Linux, Figma, **Web Development:** React, Node.js, Express.js, HTML, CSS, **Cybersecurity:** Network Security, Penetration Testing, Ethical Hacking, **Computer Science Foundations:** Data Structures & Algorithms, Object- Oriented Programming

PROFESSIONAL EXPERIENCE

Shalops , <i>UI/UX Design Intern</i>	09/2025 – Present
• Collaborated with the design and development team to create user-centered web and mobile interfaces	
• Designed wireframes, prototypes, and UI components using tools such as Figma and Adobe XD.	
Addis Ababa University , <i>Member-Robotics Team</i>	02/2025 – Present
• Contributed to designing and coding robotic systems, applying Python, algorithms, and control systems.	
Independent Developer	01/2022 – Present
• Built personal and academic projects using React, Node.js, and Python.	
STEM CENTER, Hawassa University , <i>Robotics Team Member</i>	11/2018 – 05/2020
• Participated in designing, building, and programming robots and a hydrogen-powered car for competitions and academic projects.	

PROJECTS

AI Mock Interview Platform	10/2025 – Present
• Developing an AI-driven platform that simulates real interview experiences and provides intelligent feedback.	
• Implementing OpenAI API for generating adaptive interview questions and response evaluation	
Social Media Web Application	
• Building a full-stack platform enabling user authentication, content sharing, and real-time interaction.	09/2025 – Present
• Developing RESTful APIs and responsive layouts for seamless performance across devices.
